Enterprise AI Accelerator Training

April 27th - 29th · Boston

Go from AI-curious to AI-capable faster than you ever thought possible!

Why Attend This Training

Investing in this Enterprise AI training with Brent Laster is a direct investment in your organization's future. Here's why companies across industries should prioritize sending their teams:

1. Expert Leadership – Brent Laster's deep expertise ensures staff learn best practices directly from a trusted industry leader who bridges theory and practice.
2. Immediate ROI – Employees return with skills to accelerate software development, improve efficiency, and apply AI to real-world business needs on day one.
3. Future-Proofing – As AI adoption accelerates, companies with trained staff will adapt faster to market shifts and technological disruption.
4. Capstone Deliverable – Each participant completes a working AI project, delivering tangible proof of capability that can be extended within your organization.
5. Hands-On Focus – The program dedicates significant time to labs and projects, ensuring practical skills—not just theory—are carried back to the workplace.
